Chapter 1

1 Getting Started

Congratulations on your purchase of the KODAK EASYSHARE DX3700 Digital Camera.

What Can I Do With My Camera?

Capture  Enjoy point-and-shoot operation. Store pictures in the camera’s 8 MB internal memory or on an optional, removable MultiMedia (MMC) or Secure Digital (SD) card.

Review  Display your pictures on the LCD screen and delete unwanted pictures.

Set Up  Select camera settings.

What Can I Do With My Digital Pictures?

After you install the included software:

Transfer  pictures to your computer.

E-mail  pictures to friends and family.

Print  to your home printer, make prints at a KODAK Picture Maker kiosk, or take your MMC/SD card to your photo retailer for printing.

Have fun!  Add special effects; make a slide show; fix red-eye; crop and rotate; and much more.
Chapter 1

Camera Package Contents

The KODAK EASYSHARE DX3700 Digital Camera includes:

1. Camera
2. Lithium battery, KCRV3 or equivalent*
3. Wrist strap
4. USB cable
5. Lens cap
6. Video cable
7. Dock insert (Do not discard.)**

NOTE: * AA lithium batteries may be provided. If your camera was packaged with a KODAK EASYSHARE Camera Dock, the KODAK Ni-MH Rechargeable Battery Pack is provided. For details on using the EASYSHARE Camera Dock, see page 39.

** The Dock insert is used to custom-fit your camera to the optional KODAK EASYSHARE Camera Dock.

*** In some countries, the User’s Guide is provided on a CD instead of in printed form.

A KODAK EASYSHARE Camera Dock may also be purchased separately at your KODAK retail dealer or at http://www.kodak.com/go/accessories.
Chapter 1

Attaching the Wrist Strap and Lens Cap

Thread the wrist strap as shown.

Thread the lens cap string through the loop in the wrist strap as shown in the inset.

Loading the Battery

A KODAK Lithium Battery, KCRV3 (or equivalent) is included.*

1. Open the battery door.
2. Insert the battery as shown.
3. Close the battery door.

NOTE: If the battery is removed after Date/Time are set (page 27), the camera will retain the settings for approximately 10 minutes.

See page 62 for the types of batteries you can use in your camera. For acceptable battery life and to make sure your camera operates dependably, do not use alkaline batteries.

NOTE: * AA lithium batteries may be provided. If your camera was packaged with a KODAK EASYSHARE Camera Dock, the KODAK Ni-MH Rechargeable Battery Pack is provided. For details on charging and loading the Battery Pack, see page 42.
Chapter 1

Turning the Camera On and Off

1. To turn the camera on, press the power button until the ready light glows.
   *The ready light glows orange while the camera performs a self-check. When the ready light glows steady green (and the Mode selector is set to Capture 📷) the camera is ready to take pictures.*
   *In Capture mode, the status bar is briefly displayed on the LCD. See page 7 for an explanation of the status bar icons.*

2. To turn the camera off, press the power button until the ready light turns off.
   *The camera completes any Save, Delete, or Copy operations that are in process.*

NOTE: The first time the camera is turned on, the Language and Date/Time need to be set. (See page 27.) If the batteries are removed for an extended time, the Date/Time need to be reset.
Chapter 1

Checking the Battery Level

Check the battery power level before taking pictures. For guidelines on battery usage, see page 62.

1. Turn the camera on.
2. Check the battery status symbol that appears on the LCD.
   - **Full** — batteries have adequate power.
   - **Low** — batteries need to be replaced or recharged soon.
   - **Exhausted (blinking)** — batteries are too weak to power the camera. Replace or recharge the batteries.

   When the batteries are exhausted, the ready light blinks red for 5 seconds, then the camera turns off.

IMPORTANT BATTERY INFORMATION

For acceptable battery life and dependable operation, do not use alkaline batteries.

These activities can shorten battery life:
- Using the LCD as the viewfinder (see page 12)
- Reviewing your pictures on the LCD (see page 13)
- Excessive use of the flash

NOTE: If you are using a KODAK EASYSHARE Camera Dock, keep your camera docked there for constant Battery Pack charging. For details on using the EASYSHARE Camera Dock, see page 39.
Automatic Powerdown Saves Batteries

The powerdown feature extends battery life by turning off the LCD or camera power when the camera is inactive.

Chapter 1

Checking Camera Status

In Capture mode, press the button on the 4-way controller at any time to check which camera settings are active.

1. Slide the Mode selector to Capture and turn the camera on.
2. Press the button on the 4-way controller.

*The current camera status icons are briefly displayed on the LCD. If an icon is not displayed, that camera feature is not currently activated.*

Chapter 1

Inserting an Optional MMC/SD Card

To insert a card:
1. Turn the camera off.
2. Open the card door.
3. Orient the card as shown.
4. Push the card into the slot to seat the connector. Close the door.

⚠️ CAUTION:
The card can only be inserted one way. Forcing the card may damage your camera.

Use only certified cards that carry the MultiMedia (MMC) or Secure Digital (SD) logo. See page 65 for storage capacities.
Chapter 1

To remove a card:
1. Turn the camera off.
2. Open the card door.
3. Push the end of the card in, then release it. When it is partially ejected, remove the card.

⚠️ CAUTION:
Do not insert or remove a card when the ready light is blinking. Doing so may damage your pictures, card, or camera.
Choosing Internal or Removable Memory

If an MMC/SD card is inserted in the camera, new pictures are stored on the card. If no card is inserted, new pictures are stored in internal memory.

NOTE: You can capture pictures in internal memory, then copy them to an MMC/SD card (see page 25). You cannot copy pictures from a card to internal memory.

Checking Your Picture’s Location

1. Slide the Mode selector to Review.

The storage location icon indicates the location of the picture.

- — picture is stored on an MMC/SD card
- — picture is stored in internal memory
Chapter 2

2 Taking Pictures

Taking a Picture

1. Slide the Mode selector to Capture and turn the camera on.
2. Frame your subject using the viewfinder, or turn Preview on (see page 12) and use the LCD.
3. Press the Shutter button halfway down to set the exposure and focus.
4. Press the Shutter button completely down to take the picture.

*The ready light blinks green while the picture is being saved.*

*The ready light blinks orange when the flash is recharging. If necessary, wait for the flash to charge before taking the next picture.*

⚠️ CAUTION:

Do not insert or remove an MMC/SD card when the ready light is blinking. Doing so may damage your pictures, MMC/SD card, or camera.
Chapter 2

Previewing Your Picture on the LCD

When the Preview feature is on, you can use the LCD as a viewfinder.

NOTE: Preview is required when you are using the Digital Zoom (see page 15) feature.

To turn Preview on:

1. Slide the Mode selector to Capture 📸.
2. Press the ▲ button on the 4-way controller.
   
   The LCD displays a live image and the status bar.
3. Center your subject in the LCD, and press the Shutter button halfway down to set the exposure and focus. Press the Shutter button completely down to take the picture.
4. To turn Preview off, press the ◿ button.
Chapter 2

Displaying the Picture Just Taken

The QuickView feature displays a picture on the LCD immediately after you take it. While the picture is displayed, you can delete it to conserve storage space.

Press the Shutter button to take a picture.

*The picture is briefly displayed on the LCD with the icon.*

To Delete the picture just taken:
1. While the icon is displayed, press the Delete button.
2. Follow the screens prompts.

NOTES:
- To turn QuickView off, see page 22.
- When Preview is on, QuickView is also on (regardless of the QuickView setting).
Chapter 2

Using the Flash

Use the flash when taking pictures at night, indoors, or outdoors in heavy shadows. The flash is effective 1.6 to 7.9 feet (0.5 to 2.4 m).

Press the \button repeatedly to scroll through the flash options.

The flash icon that is displayed on the LCD Status Bar is the active option.

\button

**Auto Flash**—Use for subjects other than people.

**Fill**—Use when bright light comes from behind the subject.

**Red-eye**—Use for people and animals.

**Off**—Use in existing light or when flash is prohibited.

NOTE: All flash options revert to Auto when the camera is turned off.
Using the Digital Zoom

This camera provides a 2X and 3X digital zoom.*

1. Set the Mode selector to Capture 📸.
2. Press the button to turn Preview on. Use the LCD to frame your subject.
3. Press the Select/Digital Zoom button for 2X zoom. Press again for 3X zoom. Press again to return to 1X (no zoom).

* You may notice a decrease in printed image quality when using digital zoom. See “Resolution and Print Sizes” on page 19.

Chapter 3

3 Reviewing Your Pictures

Use Review mode to display and work with the pictures stored in your camera's internal memory or on an MMC/SD card.

Viewing Pictures in the LCD

1. Slide the Mode selector to Review. If a card is present, the camera accesses the card. If no card is present, the camera accesses internal memory. The camera displays the last picture taken.
2. Press the buttons to scroll forward or backward through the pictures.
3. To exit Review mode, slide the Mode selector to Capture or Setup.

The icons displayed with the picture indicate the applied features:

<table>
<thead>
<tr>
<th>Print order</th>
<th>Internal memory</th>
<th>MMC/SD card</th>
<th>Frame number</th>
<th>Picture Location</th>
</tr>
</thead>
<tbody>
<tr>

- Good/2X Digital Zoom
- Quality: Full battery, Low battery, Exhausted battery
Chapter 3

Magnifying Pictures
1. Slide the Mode selector to Review.
2. Press the buttons to display the desired picture.
3. Press Select to magnify the picture.
4. Press the or buttons to pan horizontally or vertically.
5. Press Select to return to normal magnification.

Deleting Pictures
To delete pictures from a card, insert the card. To delete pictures from internal memory, remove the card.
1. Slide the Mode selector to Review.
2. Press the buttons to display the picture to be deleted.
3. Press the Delete button.
4. Highlight the Delete option:
   - ALL PICTURES: deletes all of the pictures in internal memory or on the card.
   - NONE: returns to the displayed picture.
   - THIS PICTURE: deletes the displayed picture, then displays the next available picture.
5. Press Select and follow the prompts.
Chapter 3

Selecting Pictures for Printing

Use the Print Order feature to select pictures on an MMC/SD card for printing.

NOTE: Print Order is available only for the pictures stored on an MMC/SD card, not for pictures stored in internal memory.

Creating a Print Order

1. Slide the Mode selector to Review, then scroll until the desired picture is displayed.
2. Press the buttons to select the desired number of prints.

</table>

* Actual print output may vary, depending on subject. See your printer or print service guidelines, or visit http://www.kodak.com for further information.
Chapter 3

Running a Slide Show

You can display pictures on the camera LCD, a television screen, or any external video device equipped with a video input.

To run the slide show on a television:
1. Connect the video cable (included with the camera) from the video-out port on the camera to the video-in port on your television.

The camera LCD turns off and the television screen acts as the camera display.

Starting the Slide Show

You can set the display interval to 5, 10, 30, or 60 seconds.
1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Review Options icon, then the buttons to highlight Slide Show. Press Select.
3. Select how long you wish to display each picture, then press Select.
   Each picture from internal memory or MMC/SD card is displayed once at the desired interval. The setting remains until you turn the camera off.
4. To cancel the slide show, press Select.

</table>
Chapter 4

Capture Options

Setting Image Quality
1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Capture Options icon, then the buttons to highlight Image Quality. Press Select.
3. Highlight the desired Quality setting, then press Select.
   - Best (2160 x 1440) for detailed images and prints up to 11 x 14 inches (large file size; low compression)
   - Better (2160 x 1440) for detailed images and prints up to 11 x 14 inches (small file size; high compression)
   - Good (1088 x 720) for small print sizes, e-mailing, or screen display (small file size; low resolution)

The default setting is Best mode. The setting remains until you change it.

Setting Macro
Use the Macro setting to photograph images from 6 to 20 inches (15 to 50 cm) from the lens.
1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Capture Options icon, then the buttons to highlight Macro. Press Select.
3. Highlight ON, then press Select.

Turning QuickView On or Off
1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Capture Options icon, then the buttons to highlight QuickView. Press Select.
3. Highlight the desired setting, then press Select.

The setting remains until you change it.
Review Options

Setting Video Out
Use the Video Out feature to match the camera’s video signal to the standard that applies in your geographical location. Video Out must be set correctly to run a slide show on a television or other external device.

1. Slide the Mode selector to Setup.
2. Press the </> buttons to highlight the Review Options icon.
3. Press the </> buttons to highlight Video Out, then press Select.
4. Highlight the desired setting, then press Select.
   - NTSC: Standard used in most countries except Europe. The United States and Japan use NTSC.
   - PAL: Standard used in European countries.

*The setting remains until you change it.*
Chapter 4

**Print Order**
Before using this feature, ensure that an MMC/SD card is inserted in the camera.

1. Slide the Mode selector to Setup.
2. Press the ▶/◀ buttons to highlight the Review Options icon, then the ▼/▲ buttons to highlight Print Order. Press Select.
3. Select All Pictures (applies to all pictures on MMC/SD card), Cancel Order, or Future Pictures (applies to future pictures and leaves current pictures unchanged). Press Select.
4. Press the ▶/◀ buttons to select the desired number of prints. Press Select.
Chapter 4

Copying Pictures

The Copy feature lets you copy pictures from the camera’s internal memory to an MMC/SD card. (You cannot copy pictures from a card to internal memory.)

NOTE: Before using this feature, ensure that an MMC/SD card is inserted in the camera.

1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Copy menu, then press Select.

A progress bar appears, then disappears when the pictures are copied. For information on picture numbering after a copy, see page 65.

NOTE: Pictures are copied, not moved. If you wish to remove the pictures from the internal memory after they are copied, delete them manually (see page 18).

Viewing Camera Information

The About this Camera feature displays information about the camera.

1. Slide the Mode selector to Setup.
2. Press the buttons to highlight About.

The information includes camera model and current firmware version.
Formatting Camera Memory or MMC/SD Card

You may need to format the camera's internal memory if it becomes corrupted. You may need to format an MMC/SD card if it becomes corrupted or if it was used in a different device. When formatting is necessary, an error message appears on the LCD. See page 45 for error messages.

⚠️ CAUTION:
Formatting erases everything from the internal memory or MMC/SD card. Removing the MMC/SD card during formatting may damage the card.

1. Slide the Mode selector to Setup.
2. Press the ▲/▼ buttons to highlight the Format menu.
3. Highlight the Format option you want to use:
   - FORMAT CARD: erases all of the information on the MMC/SD card and reformats the card for use in the camera.
   - FORMAT INTERNAL: erases all of the information in the camera's internal memory and reformats the memory.
   - CANCEL FORMAT: exits without erasing anything.
4. Press Select.
5. Highlight Continue Format, then press Select.

When the formatting is complete, the Setup menu is displayed.

NOTE: Once formatting begins, there is no way to undo the function.
Chapter 4

Selecting a Language

The Language feature allows you to display the menus and screen messages in different languages.

1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Language menu, then press Select.
3. Highlight the language you want to use.
4. Press Select to accept the changes and return to the Setup menu.

The screen text is displayed in the selected language. The setting remains until you change it.

Date/Time Settings

Setting the Date and Time

Set the date and time if you want to imprint the date on your pictures (see page 28).

1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Date/Time Set menu.
3. Press the buttons to highlight SET, then press Select.

The date format is DD/MM/YYYY. The time is displayed in a 24-hour format.

4. Press the buttons to move through the fields. Press the buttons to adjust the date and time settings.
5. Press Select to accept the changes.
Selecting a Date/Time Format
1. Slide the Mode selector to Setup.
2. Press the buttons to highlight the Date/Time Set menu.
3. Press the buttons to highlight DISPLAY, then press Select.
4. Press the buttons to highlight the desired date format.
5. Press Select.

Placing the Date on Pictures
Use the Date Stamp setting to imprint the date on your pictures.
1. Make sure the camera date and time are correct (see page 27).
2. Slide the Mode selector to Setup.
3. Press the buttons to highlight the Date/Time Set icon, then the buttons to select STAMP. Press Select.
4. Select ON or OFF.
5. Press Select.

The current date is printed in the bottom right corner of pictures you take while Date Stamp is on. The setting remains until you change it.
5 Installing the Software

Make sure that you install the software from the KODAK Picture Software CD before you transfer pictures from your camera to the computer.

MACINTOSH OS X Notice

Do not install KODAK Camera Connection Software or KODAK Picture Transfer Software. OS X ships with an image capture application that provides the functionality of both applications. These two applications are unnecessary and will not function if installed on OS X. The OS X image capture application launches when the camera is connected with the USB cable or the KODAK EASYSHARE Camera Dock.

You may wish to install KODAK Picture Software for picture viewing, editing, and sharing. Picture Software installs and runs with OS X in Classic mode.
Chapter 5

Install the Software

1. Before you begin, close all software applications.
2. Place the KODAK Picture Software CD into the CD-ROM drive.
3. Load the software:
   - **On a WINDOWS-based computer**—usually, the first install window automatically appears. If it does not, choose Run from the Start menu and type the drive letter that contains the CD followed by `\setup.exe`. For example: `d:\setup.exe`
   - **On a MACINTOSH computer**—click Continue on the install window that automatically appears.
4. Follow the on-screen instructions to install the software. If prompted, restart the computer when the installation is complete.
5. To install all applications on the CD, select Typical when prompted.
6. To choose the applications you wish to install, select Custom when prompted. See page 31 for a description of the applications that are included on the CD.

**NOTE:** Electronically register your camera and software when prompted. This allows you to receive information regarding software updates, and registers some of the products included with the camera. You must be connected to your Internet service provider to register electronically.
Chapter 5

Software Included With Your Camera

The KODAK Picture Software CD contains the following software:

**KODAK Picture Transfer Software**
Automatically transfer your pictures from the camera to the computer, then organize and rename your picture files. See page 33 for more information.

**KODAK Picture Software**
After you have transferred your pictures to your computer, use KODAK Picture Software to:
- View and share your pictures.
- Add special effects, make a custom slide show, fix red-eye, crop and rotate, and much more.
- E-mail your pictures to friends and family.
See page 35 for more information.

**KODAK Camera Connection Software**
KODAK Camera Connection Software displays the camera as a removable drive on your desktop. Access the pictures in your camera as you would the contents of any removable drive to transfer, copy, move, rename, or delete the pictures. For more information, see Transferring Your Pictures Manually on page 36.

**APPLE QUICKTIME Software**
QUICKTIME allows you to play back the portable slide show (KODAK Picture Road Show) that you create in KODAK Picture Software. For more information, refer to the QUICKTIME online help.

NOTE: Your CD may contain additional software. Refer to online help supplied with each application.
Chapter 5

Computer System Requirements

For acceptable picture transfer and editing, we recommend the following minimum requirements:

WINDOWS-Based System Requirements

- Personal computer designed for WINDOWS 98, 98SE, ME, or 2000
- Personal computer with CD-ROM drive, minimum 200 MHz microprocessor
- Available USB port
- Color display monitor with a minimum resolution of 640 x 480 (1024 x 768 recommended; 16-bit High Color or 24-bit True Color recommended)
- 48 MB available RAM for WINDOWS 98, 98SE, ME
- 64 MB available RAM for WINDOWS 2000
- 100 MB of available hard disk space

MACINTOSH System Requirements

- PowerPC-based MACINTOSH computer with CD-ROM drive
- Operating system 8.6, 9.x, X
- Available USB port or MMC/SD card reader
- Color display monitor with a minimum resolution of 640 x 480 (1024 x 768 recommended; thousands or millions of colors recommended)
- 64 MB of available RAM; 100 MB of available hard disk space
Chapter 6

Transferring Pictures To Your Computer

Before You Transfer Pictures

Before you connect your camera and transfer pictures, make sure you have installed the software from the KODAK Picture Software CD (see page 29).

Connecting to Your Computer

You can transfer your pictures from your camera to your computer using either the provided USB cable or the optional KODAK EASYSHARE Camera Dock.

Connecting With the USB Cable

1. Turn the camera off.
2. Plug the labeled ( ) end of the USB cable into the labeled USB port on your computer. If the port is not labeled, see your computer User’s Guide.
3. Plug the other end of the USB cable into the labeled USB port on the camera.
4. Turn the camera on.
Chapter 6

Connecting With the EASYSHARE Camera Dock

1. Install the Dock insert. Place the front tabs of the insert into the slots in the EASYSHARE Camera Dock cavity. Fit the insert down into the cavity and snap the insert into place.

2. Open the connection door on the bottom of the camera.

3. Place the camera in the EASYSHARE Camera Dock.

4. Push the Connect button. You can transfer files while the green light is blinking.

For more information, see page 39.

Transferring Your Pictures

KODAK Picture Transfer Software automatically opens when you have connected as shown in the previous section (Connecting to Your Computer on page 33).

Transferring on a WINDOWS-based Computer

- Click Transfer Now to transfer your pictures to the computer.
- Your pictures are transferred to the following default location on your computer: C:\Kodak Pictures.
- If you wish to change the default location, Click Setup before you click Transfer Now.
Chapter 6

Transferring on a MACINTOSH Computer

- Select the Automatic Transfer radio button, then click Transfer.
- Automatic Transfer copies all pictures from the picture storage location to your computer.
- Or, select the Guided Transfer radio button, then click Transfer.
- Guided Transfer lets you review each picture, name it, and select a destination folder on your computer.

Turning Off KODAK Picture Software Autostart

If you do not want KODAK Picture Transfer and Picture Software to start automatically, you can turn the auto start feature off. For this and other detailed information on using Picture Transfer Software, refer to the online help:

On a WINDOWS-based computer—right-click the Picture Transfer icon on the taskbar, then select Learn more about this application.

On a MACINTOSH computer—click the Help icon in the application window.

Working With Your Pictures

When your pictures are transferred, Picture Transfer Software closes and KODAK Picture Software opens.

In the KODAK Picture Software window, click the thumbnail of a picture to display it in the main window. Click the online help button for details on how to:

- add special effects, make a custom slide show, fix red-eye, crop, and rotate
- e-mail pictures
- print to your personal printer
Chapter 6

Transferring Your Pictures Manually

KODAK Camera Connection Software lets you directly access the pictures in your camera and allows you to: display and browse thumbnails of your pictures, copy all or selected pictures to your computer, open a picture directly in third-party applications, delete pictures from a storage location, format the camera internal memory or MMC/SD card, and view information on a selected picture.

Connect your camera to the computer (see page 33) and access your pictures as follows:

**On a WINDOWS-based Computer**
- When you connect your camera to the computer (see page 33), a camera icon appears in the My Computer window and acts as a removable drive.
- Double-click the camera icon in the My Computer window.
- The Camera window opens and displays the camera internal memory and MMC/SD card as subfolders.

**On a MACINTOSH Computer**
- The camera internal memory and MMC/SD card are displayed as separate icons on the desktop.
- If the icons are not displayed, turn the camera off and then turn it back on.

For information on picture names and locations, see page 65.

**KODAK Camera Connection Software Online Help**

For information on using Camera Connection Software, refer to the online help:

**On a WINDOWS computer**—right-click the camera icon in the My Computer window, then select Camera Help.

**On a MACINTOSH system**—on the Finder menu bar, choose Camera → Camera Help.
Chapter 6

Printing Your Pictures

From KODAK Picture Software
Print to your home printer with KODAK Premium Picture Paper.

From an MMC/SD Card
☑ Make your own prints at any KODAK Picture Maker kiosk.
   For recommended print sizes, see “Resolution and Print Sizes” on page 19.
☑ Order prints online from the Kodak web site.
Chapter 7

7 Using the EASYSHARE Camera Dock

The KODAK EASYSHARE Camera Dock makes it easy to transfer pictures to the computer. In addition, the Dock is a rapid battery charger for the included KODAK Ni-MH Rechargeable Battery Pack, and supplies power to the camera. To keep the Battery Pack charged and the camera ready to take pictures, store the camera in the Dock when you are not using it.

NOTE: A Dock insert, packaged with all KODAK DX-series cameras, is required to custom-fit the camera into the EASYSHARE Camera Dock. Make sure you received an insert with the camera.

If an EASYSHARE Camera Dock was not included with the camera, you can purchase one as an accessory. See your KODAK retail dealer or visit our Web site at http://www.kodak.com/go/accessories.

EASYSHARE Camera Dock Package Contents

The EASYSHARE Camera Dock is packaged with the following items.

1  EASYSHARE Camera Dock
2  AC power adapter
3  KODAK Ni-MH Rechargeable Battery Pack
4  Quick Start Guide (not shown)
Chapter 7

Installing the Dock Insert

KODAK DX-series cameras are packaged with a Dock insert, which is used to custom-fit the camera to the EASYSHARE Camera Dock.

1. Place the front tabs on the insert into the slots in the EASYSHARE Camera Dock cavity.
2. Fit the insert down into the cavity and snap the insert into place.

Connecting the EASYSHARE Camera Dock

Ensure that you have installed the software from the KODAK Picture Software CD (see page 29). Then, remove the camera from the EASYSHARE Camera Dock.

1. Plug the labeled end of the USB cable (included with camera) into the labeled USB port on the computer.
2. Plug the other end of the USB cable into the labeled USB connector on the back of the Dock.
3. Plug the AC adapter (included with the Dock) into the back of the Dock and into a power outlet.

Your AC adapter may be different from the one pictured or may have additional plugs. Use the plug that accommodates your type of power outlet.

Keep the EASYSHARE Camera Dock connected for transferring pictures. Keep the AC adapter connected for charging the Battery Pack and providing power to the camera.
Chapter 7

Installing the Battery Pack in the Camera

1. Open the battery door on the side of the camera.
2. Install the Battery Pack as illustrated.
3. Close the battery door.

⚠️ CAUTION:
The Battery Pack may only be inserted into the camera in the orientation shown. If the Battery Pack does not easily install, reposition it and try again. DO NOT FORCE IT. Doing so can damage the camera.

NOTE: The batteries in the Battery Pack are not charged. See page 42 for charging instructions.

Docking the Camera

When you are ready to transfer pictures from the camera to the computer, or charge the Battery Pack, connect the camera to the EASYSHARE Camera Dock by placing (docking) the camera in the Dock.

1. Turn the camera off.
2. On the camera bottom, slide the Dock Connection Door until it opens.
Chapter 7

3 Place the camera in the Dock, and push down to seat the connectors. The Dock locator pin fits into the camera tripod socket.

The Dock light glows green when the connectors are properly seated. The camera is now powered by the Dock.

NOTE: If the Battery Pack requires charging, the Dock light turns red and charging begins.

Charging the Battery Pack

The Battery Pack must be charged prior to use.

1. Turn the camera off.
2. Make sure the Battery Pack is installed in the camera.
3. Dock the camera in the EASYSHARE Camera Dock (see page 41).
   - Charging begins after a few seconds.
   - The Dock light glows red while charging, then glows green when the Battery Pack is fully charged.
   - Full charging takes about 2.5 hours. After the Battery Pack is fully charged, leave the camera in the Dock. It continually senses battery power and resumes charging when necessary. Under these conditions, there is no red light while charging.
   - Charging stops if you turn the camera on.

NOTE: The EASYSHARE Camera Dock only charges the provided Ni-MH Rechargeable Battery Pack. If you place the camera in the Dock with any other type of batteries, rechargeable or not, no charging takes place.
Chapter 7

Transferring Pictures

To transfer pictures from the camera to the computer:

1. Dock the camera in the EASYSHARE Camera Dock.
2. Press the Connect button.
   - The Dock light blinks green while the connection to the computer is active.

   KODAK Picture Transfer Software automatically opens on the computer and pictures are transferred. You can also transfer pictures manually while the green light is blinking (page 36).

   Then, KODAK Picture Software opens so you can work with pictures on the computer.

NOTE: When pictures are transferred, leave the camera in the EASYSHARE Camera Dock. Eight minutes after the transfer is complete, the Dock monitors battery power and charges whenever necessary.

Using a Tripod

A tripod provides stability. Connect a tripod directly to the camera tripod socket, rather than through the Dock.

The camera tripod socket is located on the bottom of the camera.
## Troubleshooting Problems

Additional technical information is available in the ReadMe file located on the KODAK Picture Software CD. For updates to Troubleshooting information, visit our Web site at [http://www.kodak.com](http://www.kodak.com)

9 Getting Help

If you need help with your camera or KODAK EASYSHARE Camera Dock, it is available from a number of resources:

- Troubleshooting - Camera, page 45
- Software application online help
- Product information by fax
- Place of purchase
- World Wide Web
- Technical support

Software Help
Help with any software application packaged with your camera can be obtained from the online help provided with the application.

Kodak Online Services

- World Wide Web    http://www.kodak.com
  (click Service and Support)

Kodak Fax Support

- U.S. and Canada    1-800-508-1531
- Europe             44-0-131-458-6962
- U.K                44-0-131-458-6962
Chapter 9

Telephone Customer Support

If you have questions concerning the operation of KODAK software or the camera, you may speak directly to a customer support representative.

Before You Call

Before you call to speak to a customer support representative, please have the camera connected to your computer, be at your computer, and have the following information available:

- Operating system
- Processor speed (MHz)
- Computer model
- Amount of memory (MB)
- Exact error message you received
- Version of installation CD
- Camera serial number

Telephone Numbers

- **U.S.**—call toll free, 1-800-235-6325, between the hours of 9:00 a.m. and 8:00 p.m. (Eastern Standard Time) Monday through Friday.
- **Canada**—call toll free, 1-800-465-6325, between the hours of 9:00 a.m. and 8:00 p.m. (Eastern Standard Time) Monday through Friday.
- **Europe**—call the Kodak Digital Imaging Support Centre toll free number associated with your location, or the U.K. toll line, 44-0-131-458-6714, between the hours of 09:00 and 17.00 (GMT/CET) Monday through Friday.
Outside the U.S. and Canada—calls are charged at National Rate.

Using Your Batteries

- **Replacement Types**—your camera can use the following battery types:
  - 1. KODAK Lithium Battery, KCRV3 *
  - 2. 1.5 volt AA Lithium batteries
  - 1. KODAK Ni-MH Rechargeable Battery Pack, rechargeable in the EASYSHARE Camera Dock *
  - 2. 1.2 volt AA Nickel Metal Hydride (Ni-MH) batteries, rechargeable *

- For acceptable battery life, and to make sure your camera operates dependably, **we do not recommend or support alkaline batteries.**

- If the battery contacts touch metal objects, the battery may short-circuit, discharge energy, become hot, or leak.

- Not all batteries are created equal. Battery life depends significantly on age, usage conditions, type, brand, and camera. Digital camera requirements are very demanding on batteries. Not all batteries perform well under these challenging conditions. In Kodak lab tests, Nickel Metal Hydride (Ni-MH)
rechargeable batteries delivered the best results in a variety of conditions. Ni-MH batteries are designed for high-demand devices, such as digital cameras, and do not exhibit the “memory” effects seen with other rechargeable technologies.

- Battery performance is reduced at temperatures below 41°F (5°C). Carry spare batteries when using your camera in cold weather, and keep them warm until you are ready to take pictures. Do not discard cold batteries that do not work. Once they are warmed, they may be usable.

**Tips, Safety, Maintenance**

- Always follow basic safety precautions. Refer to the “Important Safety Instructions” booklet packed with your camera.
- Do not allow any chemicals, such as suntan lotion, to come into contact with the painted surface of the camera.
- If the camera has been subjected to inclement weather or you suspect water has gotten inside the camera, turn off the camera and remove the battery and MMC/SD card. Allow all components to air-dry for at least 24 hours before using the camera again.
- Clean the lens and back LCD:
  1. Blow gently on the lens or LCD to remove dust and dirt.
  2. Moisten the lens or LCD by breathing lightly on it.
  3. Wipe the lens or LCD gently with a soft, lint-free cloth or an untreated lens-cleaning tissue.
- Do not use cleaning solutions unless they are designed specifically for camera lenses. **Do not wipe the camera lens or LCD with chemically treated eyeglass lens tissue. It may scratch the lens.**
- Clean the outside of the camera by wiping with a clean, dry cloth. Never use harsh or abrasive cleaners or organic solvents on the camera or any of its parts.
- Service agreements are available in some countries. Please contact a dealer of Kodak products for more information.
Chapter 10

**Camera Accessories**

Get the most from your camera by adding just the right accessories. Expand your capture options, increase your picture storage, or extend your battery life. For a full range of KODAK accessories, see your Kodak retailer or visit our Web site at [http://www.kodak.com/go/accessories](http://www.kodak.com/go/accessories).

Picture Storage Capacities

MMC/SD cards are available in different storage capacities. The table below indicates how many pictures, using typical file sizes, can be stored. Picture file sizes can vary. You may be able to store more or fewer pictures.

Locating Pictures on an MMC/SD Card

Pictures stored on an MMC/SD card use a standard agreed upon by many camera manufacturers. This allows you to use the card in different cameras. If you use a card reader to retrieve your files or cannot locate them using the software, the following description of the MMC/SD file structure may help.

**MISC folder**—contains the Print Order file created when you use the Print Order feature.

**SYSTEM folder**—used for updating camera firmware.

**DCIM folder**—root level folder, contains the 100K3700 folder. Each time you turn the camera on or insert a different MMC/SD card, any empty folders within the DCIM folder are removed.

**100K3700 subfolder**—contains all the pictures taken when an MMC/SD card is inserted in the camera and the storage location is set to Auto.
Chapter 10

Picture File Naming Conventions

The camera maintains separate and sequential numbering sequences for the pictures in internal memory and on an MMC/SD card. Pictures are named DCP_0001.JPG, and are numbered in the order in which they are taken. The first picture is named DCP_0001.JPG; the highest number allowed is DCP_9999.JPG.

File Naming Conventions on an MMC/SD Card

- When an MMC/SD card contains a picture named DCP_9999.JPG in the \DCIM\100K3700 folder, subsequent pictures appear in a new folder (\DCIM\101K3700), beginning with picture DCP_0001.JPG.
- Even if you transfer pictures to the computer or delete pictures from the camera, the camera continues to use consecutive numbers for all subsequent pictures. For example, if the last picture taken was DCP_0007.JPG and you delete it, the next picture you take is named DCP_0008.JPG.
- When you insert a different MMC/SD card into your camera, the next picture number is defined by incrementing the higher of the last picture taken by the camera, or the highest existing picture number in the folder.
- If you use the MMC/SD card in a camera other than the DX3700 camera, and that camera manufacturer adheres to this file structure standard, the \DCIM folder contains a folder named by that camera. For more information, refer to the documentation that accompanied that camera.

File Naming Conventions in Internal Memory

- When you format the internal memory, the numbering sequence restarts at DCP_00001.JPG.
- When the internal memory contains a picture named DCP_9999.JPG in the \DCIM\100K3700 folder, subsequent pictures appear in a new folder (\DCIM\101K3700), beginning with picture DCP_0001.JPG.

66
Chapter 10

File Naming Conventions After a Copy

Your camera maintains separate numbering sequences for the pictures in the internal memory, and for the pictures on the MMC/SD card. When you copy a picture, it is renumbered sequentially in the new location.

For example, in the Before Copy list below, the two pictures in the internal memory are copied to the MMC/SD card. After Copy, the copied pictures are renumbered on the MMC/SD card as DCP_0004 and DCP_0005. Additionally, if DCP_0005 is deleted, the next picture copied to the MMC/SD card is named DCP_0006. In the internal memory, the original pictures and their numbers are unchanged.

Regulatory Information

FCC Compliance and Advisory

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if
not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and the receiver; 3) connect the equipment to an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for additional suggestions.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Where shielded interface cables have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulation.

**Canadian DOC Statement**

**DOC Class B Compliance**—This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the radio interference regulations of the Canadian Department of Communications.

**Observation des normes-Class B**—Le présent appareil numérique n’émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la Classe B prescrites dans les règlements sur le brouillage radioélectrique édictés par le Ministère des Communications du Canada.
